

Elliott Bay Seawall Project

Learn about the project and provide your input!

The Seattle Department of Transportation and U.S. Army Corps of Engineers are beginning the environmental review to replace the Elliott Bay seawall.

The seawall protects Seattle's downtown waterfront from wind driven storm waves and the erosive tidal forces of Elliott Bay. Major utilities, Alaskan Way and SR 99, and rail lines are also supported by the seawall.

The seawall was built between 1916 and 1934 and needs to be replaced. It has deteriorated significantly, been damaged by gribbles and ship worms, and does not meet current earthquake standards.

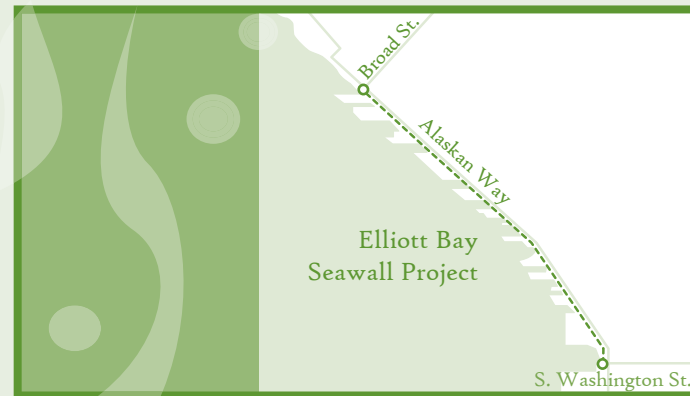

Join us at a public scoping meeting and open house to learn about:

- Project need and schedule
- Possible structural elements, habitat opportunities, and alignments
- Coordination with other area projects, including the City's central waterfront plan

Learn More at the Scoping Meeting

June 16, 2010

Bell Harbor Conference Center
2211 Alaskan Way | Seattle

4:00 – 5:30 PM: Open House

5:30 PM: Presentation, followed by Public Hearing

7:00 PM: Adjourn

Please submit scoping comments by Monday, July 19, 2010.
